

Apple Mac User-Guide

- Click on the country you want to view and save the kmz file to your desktop
- Provided you have Google Earth installed onto your computer, double click on the kmz file which will then open in Google Earth
- Go up to the top bar and click on Google Earth then down to Preferences
- Click on the Touring tab
- Put at least 15 seconds in the Tour Pause box and tick "Show balloon when tour is paused". Click OK
- Make sure your kmz file is selected in the box on the left, then click on the "play" button to play the expedition show. If you want longer to read the information in the pop-up boxes, click the pause button at any time.

PC User-Guide

- Click on the country you want to view and save the kmz file to your desktop
- Provided you have Google Earth installed onto your computer, double click on the kmz file which will then open in Google Earth
- Go up to the top bar and click on Tools and then down to Options
- Click on the Touring tab
- Put at least 15 seconds in the Tour Pause box (you can change this depending on how long you want to view the tour information for) and tick "Show balloon when tour is paused". Click OK
- Make sure your kmz file is selected in the box on the left, then click on the "play" button to play the expedition show. If you want longer to read the information in the pop-up boxes, click the pause button at any time.
